

SC

This is a high-contrast, black-and-white schematic of a printed circuit board (PCB) layout. The board is rectangular with a large, irregularly shaped cutout in the upper right quadrant. The layout features a complex network of thick black lines representing conductive traces. On the left side, there are several pairs of traces that appear to be connectors or test points. A large, solid black rectangular area is located in the upper right, possibly representing a component footprint or a specific material region. The traces are interconnected with various vias and pads. Two distinct logos are present: 'SC' in a square box in the upper left and 'JR JE' in a square box in the lower right. The entire layout is enclosed within a thin black border.
